What a great story for young people.

Telling a bit of history - hard stuff to tell younger ones but in such a good way for them to hear and understand. And putting the reader into the historical moment, bringing history alive. The reader is not only made a part of the story but there is an element of exploration as well. Plus the interest of time travel.

This has a little of something for everyone - exploration, mystery, history and intrigue.

I got this particular book because our church does a service each year to honor those who fought and died and lived during this time period - it's called Peace Service. Our church sits just a few yards from where the battle of Dranesville occurred.

I look forward to reading more of these books.

Yes, I recommend these books for others to read - become a part of history with each read.

These books are a cry of relief from the five minute books we usually read with our son and they have already taught him so much about science, nature, and particularly history. Jack and Annie, the lead characters in the series, travel through time and meet with prominent historical figures such as Equipment Queens, take a trip to the moon, spend a day with Abraham Lincoln, land in camp with General George Washington as he is ready to cross the Delaware, and even convince a young Mozart to continue his pursuit in music.

They are well written books that peak interest in subjects young kids may not yet have access to and have accompanying research guides that give detailed back stories and historical guides to the subjects covered in the novels. Although the intended audience of the series seem to be for children around 8 - 10, our five year old becomes engulfed in the stories every single evening, always looking forward to what adventure Jack and Annie are heading for next.

Amazon also tend to have a wider availability of the series than book stores like Barnes and Nobel at prices up to half the cost of the same.

A good kids book to add to the series. This is a part of the Magic Tree House series and it encourages young people to read. It has nice illustrations but not on every page. It has historical facts woven into the fantasy of the tale. The different books are loosely connected by including the major characters in each book.

Even though the subject matter is a little heavy, history is accurately approached in a "kid friendly" way for early chapter book readers. I am now onto purchasing the 3rd set of this series for my granddaughter who just started reading. Perfect condition, slight discount (hard to find on this series) and shipped out immediately. Very satisfied.

Civil War On Sunday is great, but so are all of the other books in this series. These books are a great way to get your kids interested in history and see it as something that is not just bland and boring. My grandson started reading these when he was 7, and they weren't over his head. He is 8 and still reading them.

Xarcondre

We love these books! We read a chapter or two every single night! They're fun for our daughter and educational for parents!

Gralinda

The great granddaughter chose this book from the Magic Tree House series No.21, she is an avid 2nd grade reader-who enjoyed reading it along with others offered by Amazon. Once she started the book, she wanted to complete it, which she did in record time.

excellent quality
